

# WINDFORM® **FX BLACK**

**CLASS OF MATERIAL:** Polyamide based Material

**TECHNOLOGY:** Selective Laser Sintering

Windform® FX BLACK is a new generation polyamide based material with a dark black color. Windform® FX Black's mechanical characteristics make it particularly suited for Additive Manufacturing applications. It guarantees consistent performance on repeatable jobs. Windform® FX BLACK is characterized by exceptional resistance to repeated bending and torsion. The material shows excellent impact resistance even at low temperatures. Its consistency and behaviour are similar to polypropylene and ABS injection moulded parts.

Windform® FX BLACK is perfect for creating accurate, reliable, and long lasting prototypes. No post-production treatments are needed, as the material has an excellent surface finish in its sintered state. Any additional manual finishing improves its polish. It can be considered a highly valuable material in various functional applications.

## **APPLICATIONS:**

Applications include: flexible components and functional parts with living hinges or clip fittings. It is also suitable for ducting of complex shapes, or for thin walled connectors with snap-fit systems.

Improvements in detail reproduction make Windform® FX BLACK suitable for applications which require accurate and superior definition.

Windform® FX BLACK is the material of choice for flexible components with fine details.

These applications indicated are just examples. The versatility of the product combined with the technology used, allows for near endless possibilities.

## **WHERE TO FIND WINDFORM® PRODUCTS**

CRP Technology produces items in Windform® FX BLACK and distributes the material in Europe and ROW. CRP USA produces items in Windform® FX BLACK and distributes the material in the US and North America.

Both CRP Technology and CRP USA offer individually customized services for timing and method of delivery depending on the needs of the customer; anywhere in the world.

## **HOW TO GET WINDFORM® PRODUCTS**

For any further information, requests for quotation, or to check delivery times, please visit our website [www.windform.com](http://www.windform.com) or send an inquiry to [info@windform.com](mailto:info@windform.com) (for Europe and ROW markets) or [info@crp-usa.net](mailto:info@crp-usa.net) (for US market). We will be in contact to answer all inquiries.

Flexural Strength per density unit		Mpa/[g/cc]	66,14
Flexural Modulus per density unit		Mpa/[g/cc]	1780,82

**Note: these are all indicative values.** Data was generated from the testing of parts produced with Windform® FX BLACK material under optimal processing conditions.

**Standard Technical Details for Accuracy versus Tolerance:**

For parts up to 6" (150 mm) the standard tolerance is: +/- 0.012 inches (0,3 mm)

For parts more than 6" (150 mm) the standard tolerance is: +/- 0.002 inches per inch (0,05 mm per 25 mm)

Example: For a 9" (229 mm) part, the standard tolerance would be: +/- 0.018 inches (0,46 mm).
